FLAGSHIP QUALIFICATION

BESPOKE QUALIFICATION

ISFT Certificate in Introduction to Technical Analysis in Trading

Every chart tells a story. Learn to read it.

8	16	Level 3	Online
UNITS	CREDITS	CERTIFICATE	SELF-PACED

www.derivion.in

Centre: Derivion International Private Limited (trading as ISFT) · Course code 1131240

WHY THIS QUALIFICATION

The flagship course in the ISFT short course suite.

A comprehensive, structured introduction to technical analysis — applicable across equities, FX, commodities and futures, and built for a systematic, professional-level approach to chart analysis.

Practitioner-designed

Authored by the centre's Head Educator, drawing on decades of applied chart-based trading experience across multiple asset classes and timeframes.

Market-agnostic by design

Chart reading skills that transfer directly across equities, FX, commodities and futures markets.

Standardised and accredited

Delivered under OCN London (course code 1131240), with a defined credit value, level and external quality assurance.

A real portfolio, not just a test

Learners produce a Practical Chart Analysis Portfolio of five annotated charts, backed by a written report.

WHO IT IS FOR

For traders ready to read a chart like a professional.

Designed for active traders, finance professionals, and graduates who wish to develop a systematic, professional-level approach to chart analysis.

Active traders

Want a systematic, repeatable way to read a chart.

Finance professionals

Applying chart analysis alongside fundamentals.

Graduates and Level 3 completers

Building a professional-level technical skill set.

Recommended prior learning

The Level 3 Award in Applied Financial Markets Trading or Introduction to Financial Markets, or equivalent market knowledge.

YOU WILL NEED

The ability to read basic price charts, and access to a free charting platform such as TradingView for practical exercises.

WHAT YOU WILL GAIN

Eight tools, from first candle to full portfolio.

UNIT 1

Read the assumptions

The core principles behind technical analysis.

UNIT 2

Read a single candle

Candlestick structure, and common patterns like doji and hammer.

UNIT 3

Spot a reversal

Morning star, evening star and other trend-reversal signals.

UNIT 4

Trade the breakout

Support, resistance, and managing a false breakout.

UNIT 5

Draw the trend

Trendlines, channels, and rising or falling wedges.

UNIT 6

Project a target

Classical chart patterns and Fibonacci retracement.

UNIT 7

Read momentum

Moving averages, Bollinger Bands, RSI and MACD.

UNIT 8

Build a portfolio

Five annotated charts, justified in a written report.

PROGRAMME AT A GLANCE

The numbers behind the flagship.

The most comprehensive qualification in the suite: 8 units, 16 credits, delivered fully online at Level 3.

8	16	3	10–14
UNITS	CREDITS	LEVEL	WEEKS TYPICAL

1. Foundations of Technical Analysis
2. Candlestick Patterns — Structure and Types
3. Candlestick Reversal Patterns
4. Support, Resistance and Breakout Trading
5. Trends, Channels and Wedges
6. Chart Patterns and Fibonacci Analysis
7. Moving Averages, Bollinger Bands and Oscillators
8. Market Profile, Volatility Time Bands and Advanced Tools

HOW YOU LEARN

Learn online, at your own pace.

Delivered fully online and self-paced through Derivion Academy. There is no fixed timetable: learners typically finish within 10 to 14 weeks.

01

Study

Video instruction and written materials.

02

Practise

Chart recognition exercises on a live platform.

03

Assess

An online MCQ for each unit.

04

Build

A chart portfolio and report, assessed by the Head Educator.

WHAT YOU NEED

- **Computer, laptop, tablet or smartphone**
- **A free charting platform, e.g. TradingView**
- **The ability to read basic price charts**

YOUR LEARNING JOURNEY

Eight units, from first candle to full portfolio.

1

Foundations of Technical Analysis

EB1/3/LR/038

2

Candlestick Patterns — Structure and Types

EB1/3/LR/039

3

Candlestick Reversal Patterns

EB1/3/LR/040

4

Support, Resistance and Breakout Trading

EB1/3/LR/041

5

Trends, Channels and Wedges

EB1/3/LR/042

6

Chart Patterns and Fibonacci Analysis

EB1/3/LR/043

7

Moving Averages, Bollinger Bands and Oscillators

EB1/3/LR/044

8

Market Profile, Volatility Time Bands and Advanced Tools

EB1/3/LR/045

UNIT 1 · EB1/3/LR/038

Foundations of Technical Analysis

The core assumptions behind technical analysis, how it compares to fundamental analysis, and the basic tools used to read a price chart.

2 credits

Principles underpinning technical analysis

- Explain the core assumptions underlying technical analysis: price discounts everything, prices move in trends, history repeats
- Compare technical analysis with fundamental analysis as an approach to market analysis

Basic tools for reading price charts

- Identify the main chart types and their relative uses within the context of price charts
- Explain how timeframe selection affects technical analysis

INDICATIVE CONTENT

Core assumptions of technical analysis | Technical vs fundamental analysis | Chart types | Timeframe selection

Candlestick Patterns — Structure and Types

What each part of a candlestick tells you about price action, and the common single and multi-candle patterns worth recognising.

2 credits

Structure of a candlestick

- Identify the components of a candlestick
- Explain what a candlestick's shape indicates about price action within a period

Common single and multi-candle patterns

- Identify common candlestick patterns including doji, hammer, and engulfing patterns
- Explain the typical market context in which each identified pattern is considered significant

INDICATIVE CONTENT

Candlestick anatomy | Doji, hammer and engulfing patterns | Market context for pattern significance

UNIT 3 · EB1/3/LR/040

Candlestick Reversal Patterns

The bullish and bearish patterns associated with a potential trend reversal, and how to judge whether one is likely to be reliable.

2 credits

Patterns associated with trend reversal

- Identify common bullish and bearish reversal patterns, e.g. morning star, evening star, shooting star
- Explain the conditions under which a reversal pattern is considered more reliable

Reversal pattern recognition in a chart scenario

- Identify a reversal pattern within a given chart example
- Identify factors that strengthen or weaken the reliability of an identified reversal pattern

INDICATIVE CONTENT

Bullish and bearish reversal patterns | Reliability conditions | Applied chart recognition exercises

UNIT 4 · EB1/3/LR/041

Support, Resistance and Breakout Trading

How support and resistance levels are identified on a chart, and how to trade — and manage the risk of — a breakout.

2 credits

Support and resistance

- Explain how support and resistance levels are identified on a price chart
- Describe why previously tested support/resistance levels are considered significant

Breakout trading concepts

- Explain what constitutes a price breakout from a support or resistance level
- Identify common false breakout patterns and how traders may manage this risk

INDICATIVE CONTENT

Identifying support and resistance | Significance of tested levels | Breakout trading | False breakouts and risk management

UNIT 5 · EB1/3/LR/042

Trends, Channels and Wedges

How an uptrend, downtrend or sideways trend is identified and confirmed with a trendline, and what a channel or wedge is telling you.

2 credits

How trends are identified and classified

- Explain how an uptrend, downtrend, and sideways trend are identified using price action
- Describe how trendlines are drawn and used to confirm trend direction

Channel and wedge chart patterns

- Identify a price channel and explain its trading significance
- Identify rising and falling wedge patterns and their typical implications

INDICATIVE CONTENT

Trend identification and classification | Trendline construction | Price channels | Rising and falling wedges

UNIT 6 · EB1/3/LR/043

Chart Patterns and Fibonacci Analysis

The classical chart patterns that imply a price target, and how Fibonacci retracement and extension levels are calculated and applied.

2 credits

Common classical chart patterns

- Identify head and shoulders, double top/bottom, and triangle patterns
- Explain the typical price target implied by a given classical chart pattern

Applying Fibonacci analysis to trading

- Explain how Fibonacci retracement and extension levels are calculated and applied
- Identify a Fibonacci retracement level on a given chart example and explain its trading relevance

INDICATIVE CONTENT

Head and shoulders, double top/bottom, triangles

Price target projection

Fibonacci retracement and extension

UNIT 7 · EB1/3/LR/044

Moving Averages, Bollinger Bands and Oscillators

The difference between a simple and exponential moving average, and how Bollinger Bands and momentum oscillators are used.

2 credits

Moving averages in technical analysis

- Explain the difference between a simple and exponential moving average
- Describe how moving average crossovers are used to identify potential trend changes

Volatility and momentum indicators

- Explain how Bollinger Bands are constructed and used to assess volatility
- Describe how a momentum oscillator, e.g. RSI, MACD, is used to assess overbought/oversold conditions

INDICATIVE CONTENT

Simple vs exponential moving averages | Moving average crossovers | Bollinger Bands | RSI and MACD oscillators

UNIT 8 · EB1/3/LR/045

Market Profile, Volatility Time Bands and Advanced Tools

The advanced tools professional traders use to read volume at price — then applying every technical analysis concept in a real portfolio.

2 credits

Advanced technical analysis tools

- Explain the principles of Market Profile analysis and how it represents traded volume at price
- Describe the purpose of Volatility Time Bands and Range Deviation Pivots in identifying significant price levels

Applying tools to a portfolio task

- Produce a portfolio of five annotated charts demonstrating applied technical analysis across different markets and timeframes
- Justify the analysis presented in the portfolio through an accompanying written analytical report referencing appropriate technical concepts

INDICATIVE CONTENT

Market Profile principles | Volatility Time Bands | Range Deviation Pivots | Multi-chart portfolio exercise

UNIT 8 · APPLIED TASK

Build the portfolio. Defend every chart.

Unit 8 ends with a Practical Chart Analysis Portfolio: five annotated charts across different markets and timeframes, backed by a written analytical report.

5 charts

annotated, across different markets and timeframes

1,500–2,000

words, accompanying written analytical report

Assessed by the Head Educator against a published marking brief.

CHART ANALYSIS PORTFOLIO

Five annotated charts and a report

Produce the portfolio

Five annotated charts, different markets and timeframes

Reference the concepts

Appropriate technical analysis concepts, applied

Justify the analysis

In an accompanying written analytical report

ASSESSMENT

How you're assessed.

Each unit closes with an online MCQ, auto-marked on the LMS. Unit 8 adds a Practical Chart Analysis Portfolio and report.

EB1/3/LR/038	**Foundations of Technical Analysis**	MCQ
EB1/3/LR/039	**Candlestick Patterns — Structure and Types**	MCQ
EB1/3/LR/040	**Candlestick Reversal Patterns**	MCQ
EB1/3/LR/041	**Support, Resistance and Breakout Trading**	MCQ
EB1/3/LR/042	**Trends, Channels and Wedges**	MCQ
EB1/3/LR/043	**Chart Patterns and Fibonacci Analysis**	MCQ
EB1/3/LR/044	**Moving Averages, Bollinger Bands and Oscillators**	MCQ
EB1/3/LR/045	**Market Profile, Volatility Time Bands and Advanced Tools**	MCQ + portfolio

25 questions · 50 minutes · 70% pass mark on every MCQ · portfolio of 5 charts + 1,500–2,000-word report

MCQ: recognition level

Where criteria say explain, describe or identify, you select the correct answer from plausible alternatives.

Portfolio: application

Criteria that ask you to produce or justify are assessed through the Unit 8 portfolio and report.

QUALITY AND STANDARDS

Standards you can rely on.

Assessment is quality-assured at every stage, and the qualification is reviewed every year.

1 Set

Activities are set internally by tutor/assessors so learners can meet the learning outcomes and assessment criteria.

2 Moderated

Assessed evidence is internally moderated at the centre, unless it is computer-assessed.

3 Externally verified

An OCN London External Quality Assurer moderates externally.

4 Reviewed every year

By the Head Educator, informed by learner feedback, IQA review and OCN London feedback.

WHERE THIS LEADS

Your next step beyond the flagship.

On completion, learners may progress to further study in advanced technical analysis, algorithmic trading, or professional trading programmes at Level 4 and above.
